## JELLYFISH - PART SEVEN

stitched from colouring book Lost Ocean by Johanna Basford using Cottage Garden Threads

### THREAD NO. 1,4,6 & 7

Congratulations, you're up to the final step of the jellyfish. All of the remaining fine tentacles are stitched from the head down with a normal stem stitch which transitions into an encroaching stem for the widening of the lines. Encroaching stem is stitched just like a normal stem stitch but begins to widen by stitching at an angle following the lines. It looks like an angled satin stitch but is stitched with the motion of a stem stitch. The flourishes at the ends of the tentacles are stitched in the same way.
